About Me

I am a Frontend Developer with hands-on experience building responsive, user-friendly web applications using React.js, TypeScript, and Next.js. During the Full-Stack Software Engineering program at RevoU and at PT LPP Agro Nusantara, I implemented key features such as product filtering, shopping cart functionality, user authentication, and RESTful API integration. I apply component-based architecture, global state management, and optimize performance using code splitting and lazy loading. I'm comfortable working with TailwindCSS, Git-based collaboration, and Agile workflows. Moving forward, I aim to grow as a Software Engineer who delivers clean, scalable, and impactful solutions for users.

Education

RevoU

October, 2024 – May, 2025

Full-Stack Software Engineering

Completed an intensive program focused on full-stack web development. Learned to build modern web applications using HTML, CSS, JavaScript, TypeScript, React, Next.js, TailwindCSS, and Flask.

Gained hands-on experience developing an end-to-end e-commerce project in a team setting, implementing features such as product filtering, shopping cart, and user authentication. Practiced consuming and building RESTful APIs, managing global state, writing unit tests with Jest, collaborating with Git, and applying clean code and Agile methodologies throughout the development lifecycle.

University of Technology Yogyakarta

August, 2018 – September, 2022

GPA: 3.56

Bachelor's Degree in Computer Engineering

Bachelor's Thesis: *Monitoring and Automation System for Nutrient Control in Hydroponic Plants Based on Android*

Working Experiences

Frontend Developer & IT Governance, PT LPP Agro Nusantara

March, 2025 – Present

- Built SIPinjam Sekper, an internal inventory borrowing dashboard using Next.js, TypeScript, and TailwindCSS, improving request speed and transparency.
- Integrated RESTful APIs from Laravel backend, with real-time data display, loading states, and error handling.
- Applied component-based structure and state management for scalable and maintainable code.
- Contributed in Agile sprints using Git for version control and team collaboration.

Digital Talent, PT LPP Agro Nusantara

January, 2025 – Februari, 2025

- Assisted in evaluating seven IT processes using the COBIT 2019 framework, contributing to a 30% improvement plan in service management efficiency.
- Helped draft Standard Operating Procedures (SOPs) for IT-related activities, ensuring alignment with organizational goals and compliance requirements.
- Collaborated with the IT team to document and visualize existing workflows, supporting future process improvements.
- Contributed to internal presentations on IT performance, helping management identify priority areas for development.

Staff Purchasing, PT Reska Multi Usaha

July, 2023 – May, 2024

- Coordinated the procurement of IT and operational equipment to support business continuity across multiple departments.
- Provided technical assistance, including troubleshooting hardware and software issues, as well as supporting basic network maintenance.
- Monitored and documented purchasing activities in accordance with budget constraints and vendor agreements.
- Managed IT inventory and ensured consistent availability of essential supplies for internal stakeholders.

Internship Android Developer, PT Neura Integrasi Solusi

September, 2021 – Desember, 2021

- Developed a photo-based QR code scanner feature using Java and Android Studio for an internal application.
- Built simple user interfaces using XML, ensuring responsive layout and clean design.
- Assisted in integrating the application with backend services via RESTful API.
- Participated in debugging and testing to ensure functionality and performance across Android devices.

Project Experiences

Student, RevoU

April, 2025 – May, 2025

Final Project – Frontend Development for E-Commerce Website “Farmmerce”

I developed a responsive e-commerce platform using Next.js, TypeScript, and TailwindCSS to connect local farmers with buyers. The platform included core features such as product filtering, a shopping cart, a checkout flow, and user authentication. I managed global state using React Context and ensured feature reliability through unit testing with Jest. The project was built in a cross-functional Agile team, where we collaborated using Git and GitHub for task management and version control.

Additional Information

Technical Skills:

- Programming Languages: Java, JavaScript, TypeScript, Python, C++
- Frontend Development: React, [Next.js](#), TailwindCSS, HTML, CSS
- Backend Development: Laravel, Flask
- Database Management: MySQL, Firebase
- Testing: Jest (Unit testing with React/Next.js)
- Version Control Systems: Git, GitHub
- Deployment : Netlify, VPS, Vercel
- Tools & Utilities: Visual Studio Code, Postman, Figma

Soft Skills: Problem Solving, Team Collaboration, Attention to Detail, Adaptability & Continuous Learning, Communication Skills, Time Management, Critical Thinking

Certifications:

- Full-Stack Software Engineering Certificate – RevoU (Expected May 2025)
